ZNES Group founder Sean Mirsky will serve on Rocket Crafters, Inc. (RCI) Board of Directors

Titusville, FL - Former NASA Astronaut and Rocket Crafters' Chairman and CEO Sidney Gutierrez announced today that Sean Mirsky, founder and CEO of ZNES Group, will effective immediately serve on the RCI's board of directors.

Previously Mirsky served on RCI's advisory board. "The skills and insights that Sean brings to the RCI board of directors is outstanding. We are honored that he has agreed to serve on our board of directors," Gutierrez said. "As I said previously, the addition of Sean to the RCI family is another major step as we move forward in our quest to make access to space safe, affordable, and routine."

Mirsky's company, which is located in the Lake Mary area of greater Orlando, is an electronic trading and consultancy firm that leverages creativity, plus the company offers technical skills as well as business expertise to solve difficult, complex, technical and business problems.

He is considered a leading expert in macroeconomic trading and global communications infrastructure. Prior to creating ZNES, Mirsky was associated with Jump Trading, Infinium Capital Management and Goldman Sachs.

Rocket Crafters, based in Titusville, FL, is developing Intrepid-1, a revolutionary two-stage to orbit space launch system. When brought to market later in this decade, Intrepid-1™ will be the world's first mass-producible, customizable launch vehicle. Constructed from 3D printed carbon fiber composites and powered by D-DART, a breakthrough in advanced hybrid rocket engine technology, Intrepid-1 will set a new standard in rocket safety, economy, and performance.
